

# DisTool Weld

DISTANCE LEARNING TOOL

## TRANSLATING & IMPLEMENTING A DISTANCE LEARNING TOOL IN 4 NEW COUNTRIES

**DISTOOLWELD** is a European project, co-funded by the European Commission under the Lifelong Learning Programme. The project aims to translate and implement a distance learning tool in 4 new countries: PT, RO, IT and PL, promoting innovative distance learning methodologies for welding education.

### THE REASON

Welding is the most important fabrication technique used in manufacturing. Failure in a weld leads to disastrous consequences, thereby creating the need for proper and effective training of welding professionals.

### THE OBJECTIVE

To improve distance learning education conditions and methodologies in PL, RO, IT and PT, based on already tested practices in one of the project partners – DE

### HOW

Translation and implementation of a distance learning software developed by the German partner allowing for:

- *Reduction in course duration (from 438h to 350 – aprox. 3 months course reduction);*
- *High technical quality of contents, in accordance with IIW Guideline IAB-252-07;*
- *Flexibility in terms of course planning and preparation;*
- *Reduced employee downtime and overall reduced expenses;*
